Alpine Adaptive Ski Program

The Regina Alpine Adaptive Ski Program believes that all people have an equal right to participate in Alpine Skiing regardless of ability

The Regina Adaptive Ski Program has adaptive ski equipment for various types of disabilities. We offer lessons to individuals with cerebral palsy, spina bifida, spinal cord injuries, multiple sclerosis, muscular dystrophy, visual impairment, and lower extremity amputations that can wear a prosthetic which supports some body weight.

Our program has instructors with specialized training and certification through the Canadian Adaptive Snow Sports (CADS) with Level 1, Level 2, and Level 3 Certifications.

Training days will be held at Mission Ridge Winter Park at Fort Qu'Appelle, Sask. Mission Ridge has added many features to make their facility handicapped accessible, accessible washroom, ramps, elevator, carpet lifts and chair lift.

Check out the Regina Ski Club Web site: www.reginaskiclub.ca look under Programs / Alpine Adaptive Ski Program Tab
