Good Spirit Lake Provincial Park offers 19 km of trails groomed for cross-country skiing along the south-eastern shores of the lake.

The trails are generally well sheltered offering a smooth send off for the first four kilometers, to the ski shack, centralized on the main trail. Further along this trail, six trails, averaging about a kilometer each, loop on and off the main line. These trails allow for figure eight skiing among each joining trail, again near the shelter allowing for short loop skiing and access to warming up at the shelter. As you proceed sand dunes reach up to offer more of a challenge and great views of our unique, ongoing horizon.

The trails are well groomed and there is good signage at all the junctions.

NOVICE SKIERS WILL ENJOY EVERY TRAIL AT GOOD SPIRIT LAKE
